

Measurement Template

Please make all measurements in millimetres

Where more than one template is needed, please label with **A, B, C** etc within the red circle

If marking the templates, please do so in a 'left to right' order. As if you were viewing the complete order

We will cut the exact measurements that you input into this template. Please ensure they are correct. Failure to do so may result in bad fitment of panels, which Genie Splashbacks cannot be held responsible for

For guidance on measuring, please refer to our information guides on our website
